## Amateur Radio Emergency Communications

**AREC is the SERVICE ARM of New Zealand Amateur Radio Transmitters Inc.**

“Providing skilled volunteers, enabling essential communications to support Search & Rescue, Disaster relief and our community.

### **WHO ARE WE?**

AREC is the public service arm of NZART, a registered charity. Our experienced volunteers provide communication and technology services all over NZ. We are open to all members of NZART (transmitting or non-transmitting). Our highly competent, experienced volunteers establish and deliver communication where ever and whenever a search or emergency event may occur.

### **WHO DO WE WORK WITH?**

Our professional volunteers offer their specialist communications and technical skills free to the public in support of the search and rescue sector, civil defence, and other emergency services. This service runs 24 hours a day, 7 days a week via the New Zealand Police, the Rescue Coordination Centre, and other lead agencies such as NEMA/CD and FENZ. AREC also provides communication and technical support to community and sporting events.

### **WHAT'S IN IT FOR YOU?**

As a member of AREC, you will be able to enjoy such benefits as local and national training, participation in SAR exercises and search operations. You will also enjoy the common interest and camaraderie of fellow AREC members, our newsletters and meetings in your local district. Once you join as a member, you will be issued with an identification card, and get access to AREC branded clothing. Most of all, you will be supporting people in distress, and in your community.

**This is a great opportunity to apply your radio and technical know-how to benefit people in distress, while providing service to the community.**

For more information, check us out through the NZART page. Alternatively look us up on **FACEBOOK** under **ARECnz** or contact us at **admin@arec.nz**

## FROM THE EDITOR

**C**all book is finally here for 2023/2024. Taking onboard the feedback that the last Call book had too many Silent Keys in it I took on the task of making sure all the Silent Keys were removed.

This was a far bigger job than anticipated, it has taken from October 2023 until April 22nd, 2024, to research all the silent keys and remove them. Approximately 15% of the previous Call book was Silent Key

Call book editors normally start the major work of compiling to ready for publication from the middle of September through to October, Call book comes out with the November/December edition of *Break-In*, any changes or updates made after September 30th may or may not be published and will be added in the next edition, having said this I have done my best to make sure all current known ZL listings are correct. We use the information on the RSM database so if your information is not correct on

RSM, then please either login to your RSM account online and update it or contact RSM by free calling 0508 776 463 to update your listing via telephone, it is the call-sign owner's responsibility to keep their contact details such as address and phone number up to date with RSM and NZART. **NZART cannot update your information with RSM, as we do not have permission to do this so, please do not ask HQ to do this.**

I would like to thank Neill Ellis, ZL1TAJ once again for his maps and band plans, Angela Christmas for her pre-press work Also all of you for the patience you have shown in me as I've worked to get this edition out

## AMATEUR RADIO

### What is Amateur Radio?

Amateur Radio, also affectionally known as "Ham Radio", is a hobby of constructing, experimenting, and communicating with radio equipment.

In New Zealand, the Ministry of Business, Innovation and Employment (Radio Spectrum Management) issues licenses to Radio Hams. Once licensed, an amateur can operate radio equipment from home, from their vehicles or from anywhere in New Zealand. Several radio frequencies have been set aside for Amateur Radio. Using these frequencies any amateur radio operator can talk across town or around the world.

The scope and possibilities are endless – from talking across town to your local repeater, to operating in international contests or talking through Amateur Radio satellites.

### Who can be Hams?

Anyone can become a Ham, there is no age limit or any other barrier to becoming a Ham. Some famous Musicians, Actors, Kings and Prime Ministers are Hams, but most are people from all walks of life who like communicating and experimenting with radio and electronics. Young people find Amateur Radio a great training ground, older people find "Ham Radio" an absorbing retirement hobby.

Amateur Radio is more than a hobby, it is also a service. Hams willingly contribute their time, equipment, and operating skills whenever the need arises, especially during Civil Defence emergencies as well as search and rescue operations. The

Amateur Radio Emergency Communications (AREC) are a subgroup of NZART that assists emergency communications for the Emergency Services.

### How do I become a Ham?

Passing a Ham license is quite easy. For an Amateur Radio license, you need to correctly answer at least forty out of sixty questions from a multi-choice question paper. The questions cover radio theory and regulations. A good way to start is to download study guides from <https://www.nzart.org.nz/learn/study-guides> and you can also download the public domain question generator at <https://www.nzart.org.nz/learn/exam-generator>

As a newly licensed Ham you will be able to operate on amateur bands below 5MHz or above 25MHz. After three months operation and with fifty logged contacts you will be able to operate on all New Zealand amateur bands including those between 5 MHz and 25MHz.

### Where do I get more information?

The New Zealand Association of Radio Transmitters (Inc.) is a non-profit association of Amateur Radio Operators. NZART has branches and instructors in most of the larger cities and towns. For more information on Amateur Radio and details of a club near you, check out the NZART website at <http://www.nzart.org.nz/> or contact The Business Manager, via email on [nzart@nzart.org.nz](mailto:nzart@nzart.org.nz)

## OFFSETS, IRLP and Naming Information

### Bands, Offsets and Frequency of Transmission

6 m	User transmits 1 MHz lower
2 m	Rotorua Linear on 144.350 MHz, User Tx is 600 kHz higher on 144.950 MHz User transmits 600 kHz lower for repeater output frequencies of 145.325 to 147.000 MHz. User transmits 600 kHz higher for repeater output frequencies of 147.025 to 147.375 MHz
70 cm	User transmits 5 MHz lower for 438.xxx and 439.xxx. User transmits 5 MHz higher for 433.xxx and 434.xxx
32 cm	User transmits lower by 12.000 MHz
23 cm	User transmits lower by 20.000 MHz (Exception: Mount Victoria which is inverted, User transmits 20 MHz higher)

### Internet Radio Linking Project (IRLP)

1. For information see <http://www.irlp.net/>
2. Simplex IRLP nodes are shown on the Digital pages

### Naming of Repeaters

The repeaters name is split into two parts: The name (this is normally named after the repeater's location) and the frequency of transmission. The frequency is also split into two parts: an abbreviated version and the full transmit frequency in MHz. The name and abbreviated frequency are in **BOLD** and in the example below, Masterton 680 is used. The decimal point is ignored in the abbreviated version.

**Masterton\_146.800**

The frequency in MHz includes numbers in front of the bold numbers and includes the decimal point.

**NOTE:** If the last digit of a repeater's frequency is a zero, it is not shown as part of the abbreviated name as shown above. **Barton\_147.325** has a four-figured abbreviation of Barton 7325 where the last digit is a number five.

# NZ South Island AR UHF Repeaters

- Notes:** 1. The naming system is explained on the map NZ South Island AR UHF Repeaters  
 2. Repeater **Offsets** are explained on the map Wellington & Wairarapa AR UHF & VHF Repeaters

National System repeaters are listed on their own page

### Naming of Repeaters and Beacons

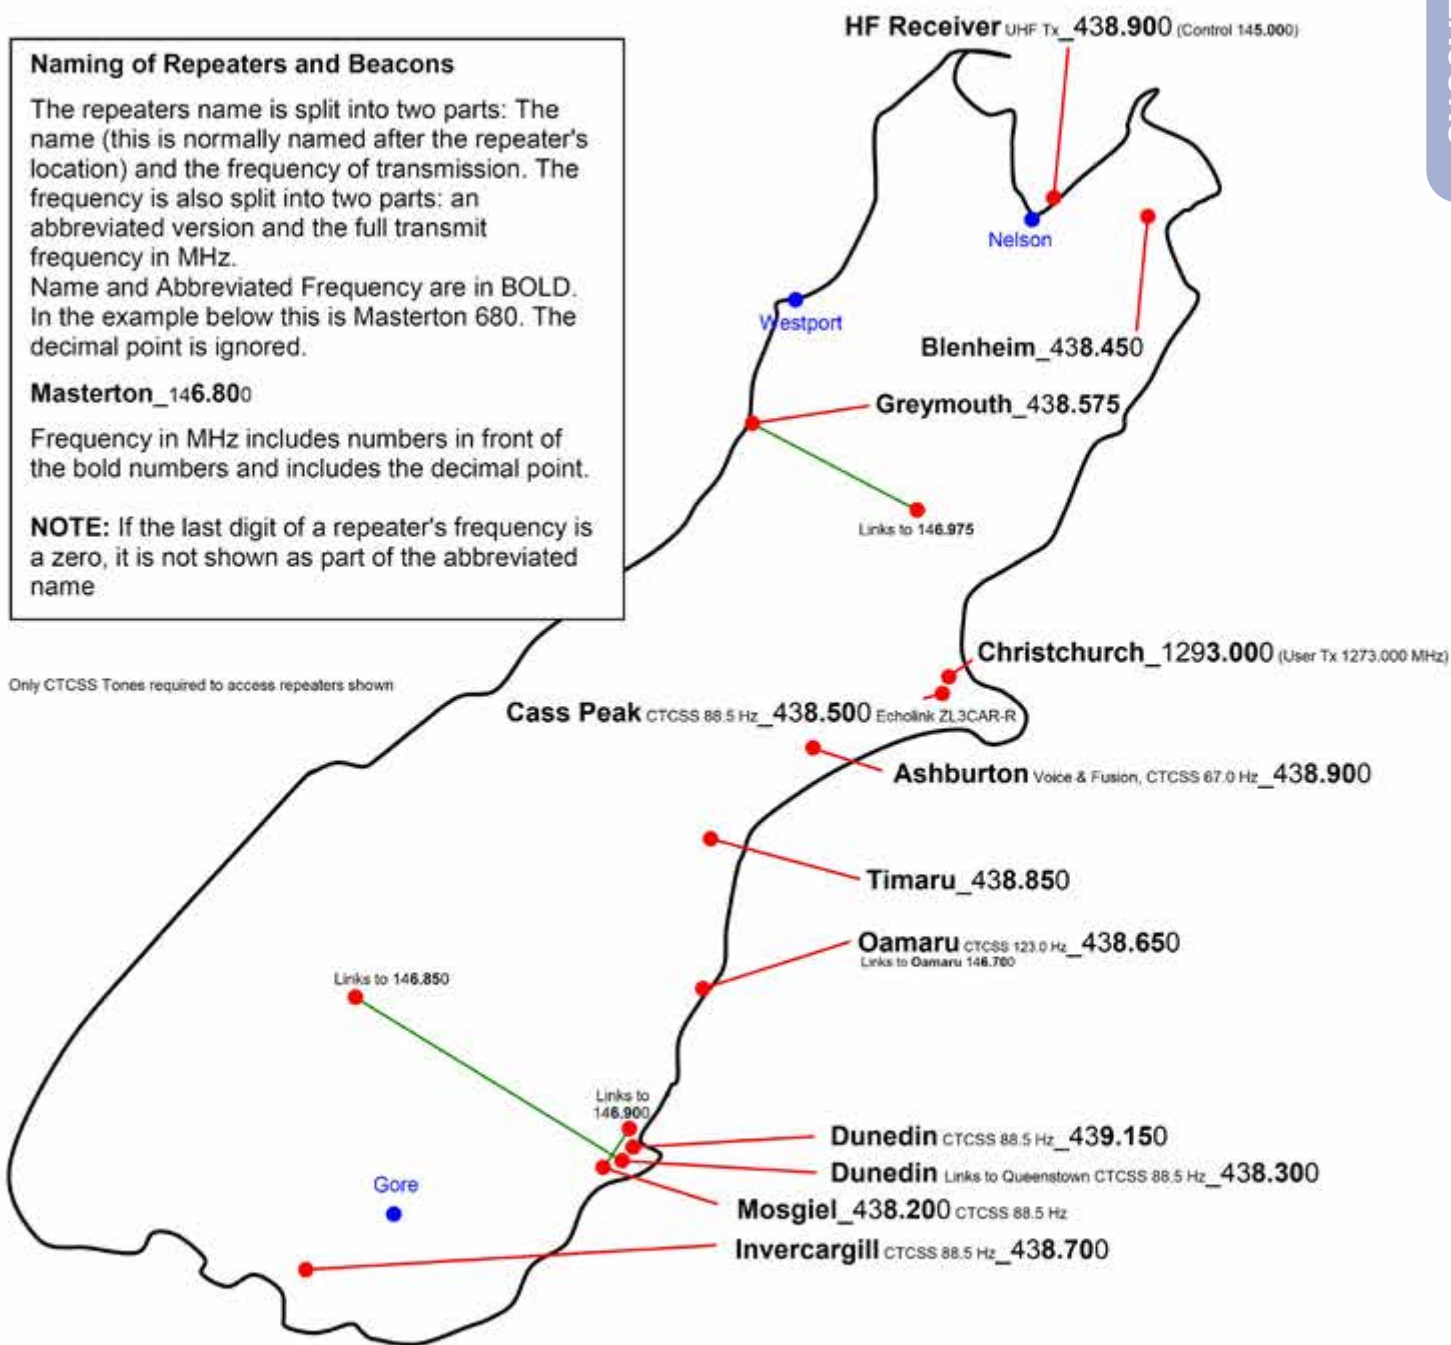

The repeaters name is split into two parts: The name (this is normally named after the repeater's location) and the frequency of transmission. The frequency is also split into two parts: an abbreviated version and the full transmit frequency in MHz.

Name and Abbreviated Frequency are in **BOLD**. In the example below this is Masterton 680. The decimal point is ignored.

**Masterton\_146.800**

Frequency in MHz includes numbers in front of the bold numbers and includes the decimal point.

**NOTE:** If the last digit of a repeater's frequency is a zero, it is not shown as part of the abbreviated name

# THE Q-CODE

QRG	Will you tell me my exact frequency (or that of ...)? Your exact frequency (or that of ...) is ... kHz	QSB	Are my signals fading? Your signals are fading
QRH	Does my frequency vary? Your frequency varies	QSD	Are my signals mutilated? Your signals are mutilated
QRI	How is the tone of my transmission? The tone of your transmission is (1. Good; 2. Variable; 3. Bad)	QSK	Can you hear me between your signals? I can hear you between my signals
QRK	How intelligible are my transmissions? The intelligibility of your signal is ... (1, 2, 3, 4,5)	QSL	Please acknowledge receipt. I acknowledge receipt
QRL	Are you busy? I am busy (or I am busy with...) Please do not interfere	QSM	Shall I repeat the last message I sent you, or some previous message
QRM	Is my transmission being interfered with? You are being interfered with... (1. Nil; 2. Slightly; 3. Moderately; 4. Severely; 5. Extremely)	QSN	Did you hear me (or ...) on ...KHz? I did hear you (or ...) on ...KHz.
QRN	Are you troubled by static? I am troubled by static (1-5 as under QRM)	QSO	Can you communicate with ... ? direct or by relay I can communicate with ... direct (or by relay through ..)
QRO	Shall I increase power? Increase power	QSP	Will you relay to ...? I will relay to ...
QRP	Shall I decrease power? Decrease power	QST	General call preceding a message addressed to all amateurs and ARRL members.
QRQ	Shall I send faster? Send faster (... wpm)	QSU	Shall I send a reply on this frequency (or ...KHz)? Send a reply on this frequency (or ... KHZ).
QRS	Shall I send slower? Send slower (... wpm)	QSV	Shall I send a series of Vs on this frequency (or on ...KHz.)? Send send a series of Vs on this frequency (or on ...KHz)
QRT	Shall I stop sending? Stop sending	QSW	Will you send on this frequency (or on ...KHz)? I am going to you send on this frequency (or on ...KHz)
QRU	Have you anything for me? I have nothing for you	QSX	Will you listen to ... on ... KHz? I am listening to ... on ... KHz
QRV	Are you ready? I am ready	QSY	Shall I shift frequency? Shift frequency to ...
QRW	Shall I inform ... that you are calling him on ... kHz? Please inform ... that I am calling on ... kHz	QSZ	Shall I send each word or group more than once? Send each word or group twice (or ... times)
QRX	When will you call me again? I will call you again at ... hours.	QTC	Have you any messages? I have ... messages for you
QRZ	Who is calling me? You are being called by ...	QTH	What is your location? My location is ...
QSA	What is my signal strength? Your signal strength is ... (1, 2, 3, 4, 5)	QTR	What is the correct time? The time is ...

# New Zealand Amateur Radio Band Plans

These charts show the New Zealand band plans. These band plans are to ensure your transmissions do not impose problems on other operators and that their transmissions do not impact on you. It is to the advantage of all operators that the published band plans are used. The Ministry of Business Innovation and Employment (MBIE) defines these band limits, while the internal band segments are derived from the IARU Region 3 band plans with New Zealand adaptations. The band limits are found in Radiocommunications Regulations (General User Radio Licence/GURL for Amateur Radio Operators) located at: <https://www.rsm.govt.nz/assets/Uploads/pdfs/gazette/c9cc2398c0/amateur-radio-operators-gurl-2017.pdf> and at each end of the band blocks as shown below. The IARU Region 3 band plans, developed to meet international requirements, are at the IARU Region 3 web site: <https://www.iaru.org/wp-content/uploads/2020/01/R3-004-IARU-Region-3-Bandplan-rev.2.pdf>. Please conduct your transmissions in accordance with the "IARU Region 3 Ethics and Operating Procedures" which NZART supports: <https://www.iaru-r3.org/on-the-air/code-of-conduct/>

## NZ 2 m Band Plan

Amateur radio are secondary users of the 146.000 to 148.000 MHz section of the 2 metre band. As secondary users we must accept interference from, and must not cause interference to the primary users should they be using the spectrum. Fortunately in NZ this is unlikely to be problematic the majority of time.

144.025 to 144.035 MHz	Earth-Moon-Earth (EME) All modes (IARU Region-3)
144.000 to 144.100 MHz	Earth-Moon-Earth (EME) All modes (Oceania)
144.100 MHz	Oceania (External to NZ) SSB & CW Calling.
144.120 MHz	JT65, MSK144, Q65, FT4, FT8. Narrow Weak signal DX (All Regions)
144.174 MHz	FT8 Narrow Mode Weak Signal DX (Region-3)
144.200 MHz	New Zealand (Internal to NZ) SSB & CW Calling.
144.230 MHz	Meteor Scatter. All modes.
144.250 to 144.300 MHz	Beacons (Geographical Plan - 1 kHz spacing) (Horizontal Polarisation)
144.300 to 144.335 MHz	WSPR, FTx, JTx, CW non geographic beacons. Narrow, 200 Hz or less.
144.350 MHz	Rotorua Linear Repeater Output.
144.400 MHz	Legacy modes. AM, RTTY & Experimental. (Note-1)
144.450 MHz	Linear Repeater output, Spare for future use. (Note-1)
144.489 MHz	WSPR Narrow Mode Weak Signal DX (IARU Region-3) (Note-1)
144.500 MHz	FM Calling frequency. (Note-1)
144.550 MHz	Narrow Digital mode. (Note-1)
144.575 MHz	APRS and Simplex Data. (Note-1)
144.600 to 144.700 MHz	Digital Voice (DV) Modes Simplex. (Note-1)
144.625 MHz	Digipeaters Licenced in some regions. (Note-2)
144.650 MHz	Packet radio, Digipeaters and other legacy data modes
144.950 MHz	Rotorua Linear Repeater Input.
147.050 MHz	Linear Repeater Input, Spare for future use. (Note-1)
144.725 to 145.200 MHz	Repeater Inputs.
145.225 MHz	FM Simplex Experimental modes.
145.250 MHz	Narrow Band Picture Modes (SSTV, Fax, Hellschreiber etc)
145.275 to 145.300 MHz	FM Simplex Experimental modes.
145.325 to 145.775 MHz	Repeater Outputs.
145.800 to 146.000 MHz	Satellite Operations (IARU Region-3 & International allocation)
145.825 MHz	Satellite APRS ( IARU Region-3)
146.025 to 146.400 MHz	Repeater Inputs.
146.425 to 146.600 MHz	FM Simplex General use.
146.625 to 147.375 MHz	Repeater Outputs.
147.400 to 147.450 MHz	DV Hotspots.
147.475 to 147.600 MHz	FM Simplex General use.
147.625 to 147.975 MHz	Repeater Inputs.

### 2 m VHF Notes

Note-1: Australian Beacons operate from 144.400 to 144.600 MHz. QRM could be caused to operators listening for Australian beacons.

Note-2: DV Users should give way to Licenced Digipeater traffic.

432.600 MHz	Digital Voice (DV) Modes Simplex.
432.625 to 432.675 MHz	FM digital modes.
432.650 MHz	Packet radio, Digipeaters and other legacy data modes
432.675 MHz	Packet radio, Digipeaters (Secondary allocation)
432.700 MHz	VOIP FM Simplex.
432.725 to 432.800 MHz	Digital Voice (DV) Modes Simplex.
432.825 to 432.975 MHz	FM Simplex General use.
433.000 to 434.975 MHz	Repeater Inputs / Outputs (See Note-1)
434.800 to 435.000 MHz	National System Repeaters Network (See Note-1)
435.000 to 438.000 MHz	Satellite Operations (Region-3 & International allocation)
438.000 to 439.775 MHz	Repeater Inputs / Outputs (See Note-1) (See Note-2)

439.800 to 440.000 MHz	National System Repeaters Network (See Note-1)

### 70 cm UHF Notes

Note-1: Repeaters in this band are either Positive or Negative 5 MHz offset but where there are problems with SRD / LIPD devices on the repeater input a suitable offset repeater frequency pair can be obtained from ELG.

Note-2: Repeaters in this band are historically using a negative receive 5 MHz offset, however where avoidance of SRD / LIPD devices may be required, the frequency pairs may be reversed. This is not recommended where the repeater is located in a built up area. Alternatively a 7 MHz negative receive offset can be used where appropriate. See Note-3

Note-3: Used for repeater input links and repeaters with outputs in the 438.000 to 438.950 range. These repeaters are treated on a case by case basis where they may be unable to operate using the standard 5 MHz negative offset due to SRD / LIPD interference.

Note-4: Australian Beacons operate from 432.400 to 432.600. QRM could be caused to operators listening for Australian beacons.

## The Standard 1 MHz Narrow Band Segment follows:

- f + 0.200 SSB Calling
- f + 0.250 to 0.300 Beacons (Geographical plan - 1 kHz spacing)
- f + 0.500 FM Calling
- f + 0.550 FM Simplex
- f + 0.575 APRS and simplex data
- f + 0.600 P25 Simplex
- f + 0.650 Packet Radio simplex data
- f + 0.700 D-Star Simplex
- f + 0.750 YSF/NXDN (Fusion)
- f + 0.800 DMR Simplex

**Please note that often repeaters and equipment owned by any club in recess are maintained by amateur radio members in the area out of their own pocket. If you are travelling through an area and QSO with others from that area, say thank you for keeping the equipment serviced.**

## Emergency Communications

Ngā Irirangi Ohotata Tūao

## Communications Plan In an emergency...

### General user Radio Licence for Amateur Radio Operators. General Condition 6.

*"In accordance with Article 25 of the International Radio Regulations, amateur operators are encouraged to prepare for, and meet, communication needs in support of disaster relief."*

### Important first steps

- Make sure that you, your family, and your property are safe and secure before you volunteer to help others.
- Monitor your local frequencies.
- Follow any instructions you receive from AREC net control or authority on the frequency.
- Check in if and when check-ins are requested.
- Contact your local AREC group leader for further instructions.
- Do not go to an incident scene "just in case" you can help.

### Frequencies to monitor

In the initial stages of an emergency the primary frequencies to monitor for information are:

- **HF** - 3900kHz USB, 7100 kHz USB
- **VHF - Your local repeater** - see NZART Repeater maps in this Callbook.
- **UHF National System repeater** - see NZART repeater maps in this Callbook.
- **National VHF Simplex Calling Channel 144.500 MHz.**
- **VHF or UHF simplex channels commonly used in your area.**
- **UHF National DMR system repeater ZK talkgroup** - see NZART Repeater maps in this Callbook

Use these channels to establish contact with other amateurs in your area and seek or offer if necessary. Any announcements about AREC response will be made on these channels.

### HF Note - All frequencies Upper Side Band (USB)

80 metres	5MHz (For use only by stations operating under AREC callsigns)	40 metres
3900 - Calling	5320 - Working Channel	7100 - Calling
3890 - Working Channel	5395 - Working Channel	7095 - Working Channel
3875 - Working Channel		7060 - Working Channel
3550 - Working Channel		

## VHF/UHF FM Simplex

The following table lists FM simplex channels available for AREC operations.

144.500 is the National Calling Channel.

144.300	144.475	146.475	147.400	147.575	432.800

## Channels outside the Amateur Bands

AREC is authorised to use some frequencies in the commercial HF, VHF, UHF bands, and the 138-144 MHz emergency services band to communicate directly with response agencies.

These communications are restricted to AREC stations using approved equipment, and are subject to the conditions of the licence held by the agency involved.

# NEW ZEALAND AMATEUR RADIO STATIONS PERSONAL CALL-SIGNS

Radio Spectrum Management (RSM) in the Ministry of Business, Innovation and Employment have provided the call-sign information for the Call Book from their SMART Register. RSM and NZART have endeavoured to provide an as accurate call-sign list as possible.

If your Call Book record is not printed correctly, it is likely that your record in RSM's Smart register contains incorrect or incomplete information.

You can check your address details in SMART online at <https://rrf.rsm.govt.nz/> without logging in. Click on Search Certificates and Call-signs and enter your call-sign suffix in the Call-sign box (e.g., 3DW). Then click Search. Next click the Client No to the left of your name. Then click Address or Contact Details. If Suppress Address Display is checked, your address will not be published online or in Call Book. If you are logged on you will be able to change the address information. If you are not logged on you will not be able to change the information.

You can change your address details or cancel your radio licence either:

- Online if you have a logon at <https://rrf.rsm.govt.nz/>
- By email to [rsmlicensing@mbie.govt.nz](mailto:rsmlicensing@mbie.govt.nz)
- By phone, calling RSM on 0508 776 463

The address published in Call Book is the Postal/Billing address (unless Blank).

If your Call-sign is missing from Call Book, first check that it is in SMART. If it has "RSM Reserved" beside it, this means that RSM were unable to contact you by email or letter to confirm that your address details are correct. If this is the case, advise RSM at [rsmlicensing@mbie.govt.nz](mailto:rsmlicensing@mbie.govt.nz) or telephone the Business Service Centre on 0508 776 4636 with your details.

Please note that it would be appreciated if text could be entered with only first letter capitalised. It makes the Call-Book Editor and the Typesetter's job much easier.

For Silent Keys, there is a form available at: <https://www.nzart.org.nz/assets/forms/2018%20Silent%20Key%20Removal%20Form.pdf>

This can be filled out and posted to NZART Business Manager at HQ (PO Box 40-525 Upper Hutt 5140) with relevant supporting documentation by the person authorised to request the deactivation of the call sign.

Note: It is recommended that Amateurs leave a signed copy of the filled-out form with their will, removing another job that the next of kin are required to do.

### APPLICATION TO REMOVE A CLIENT RECORD FROM THE RADIO SPECTRUM MANAGEMENT REGISTER.

The Radio Spectrum Management Database is a government register established and maintained under the Radiocommunications Act 1989. A callsign cannot be removed from the register, or given to a family member who is qualified to hold the callsign, unless either the ARX at NZART or RSM receives a direct instruction from a person with authority to make the request.

Please fill in as much of this form as is known and return to NZART at the above address.

I, the undersigned, instruct NZART to action the following callsign(s) and information in the RSM database:

Name: \_\_\_\_\_

Address: \_\_\_\_\_

Date of Birth: \_\_\_\_\_

Callsign(s): \_\_\_\_\_

#### Reason for Application:

Options: (Please cross out the option that does not apply)

1. I instruct NZART/RSM to remove the callsign(s) from the RSM Register. I understand that the callsign(s) will not be reallocated for a period of 12 months unless I make a direct request for the callsign(s) to be reallocated to a specific person within this period.
2. I instruct NZART/RSM to remove the callsign(s) from the RSM Register. I give my permission to allocate the following callsign(s) to the following qualified person/people/organisation.

Call-sign: \_\_\_\_\_ Person/Organisation: \_\_\_\_\_

Name: \_\_\_\_\_ Signature: \_\_\_\_\_

Relationship to client: Next of Kin / Power of attorney / Executor in Estate

CALL-SIGNS

# THE AMATEUR'S CODE

## The Radio Amateur is:

### **CONSIDERATE ...**

*always conscious of others while operating,  
and inclusive of those wishing to communicate*

### **SUPPORTIVE ...**

*offers encouragement and support to all amateurs,  
is involved with local clubs, mentoring new amateurs,  
supports the national association  
who represent all amateurs.*

### **PROGRESSIVE ...**

*Uses their knowledge and skills  
in the advancement of all things relevant  
to the amateur radio fraternity.*

### **FRIENDLY ...**

*Is understanding and patient, always offering  
friendly advice and assistance to beginners  
and above all is considerate to those  
less experienced in amateur radio.*

### **BALANCED ...**

*always aware that family, work and  
the community  
must be prioritised over radio operations.*

### **HELPFUL ...**

*Always available to offer service and skills to the community  
and country when called upon.*
