### **Operator Comments**

- Running of a 12V car battery with solar panel
- Wasn't a fun night sleeping in the car
- Great weather made the weekend enjoyable. Highlights: Working Greg ZL1GSG on all 10 bands to 24GHz and being able to work Nick ZL1IU on 23cm from Egmont
- Finally a weekend up the mountain without gale force wind
- Starting at Sunday morning with 3°C
- The weekend wasn't that great conditions wise and the strong cold wind Saturday night didn't help. Sunday was a better day and the wind had dropped a bit but still cold.
- Chris ZL7DX was along for the ride as he was straying with me the weekend and was amazed at the uWave contacts.
- Very windy all weekend with showers of rain and hail on Saturday. Had only a minimal set of aerials up due to wind. Unfortunately 2 metre aerial was faulty.
- Band conditions were poor but microwave bands worked well on Sunday.
- Quite a bit of wind getting the tent set up. Nice weather this time. Noise on 5.7 GHz huge since last time. Good to work almost all the bands we had and some over great distances. Good to work Wayne on 5.7 & 10 GHz sigs better than 1296 in some instances. Need more IF radios!

Thanks to all that participated  
Congratulations to Wayne to get over the magic 10,000 Points mark

Greg Storz, ZL1GSG
