## From the NZART Business Manager Debby ZL2TDM

Debby Says...

### **Callbook 2007/2008:**

What a debacle, and all because Radio Spectrum Group gave us a copy of the database they thought was correct. Yes all information published is sent direct from them. How could we know after all these years of requesting this information and being given it on the proviso that nothing is amended in accordance with the Privacy Act, that it would create such a furor!

To say that I have been disappointed, by members and non-members comments is an understatement. I have received unkind and absolute rude comments regarding this years production of call book as has NZART President Bruce ZL2WP, and in many of the cases ownership of the information printed, rests entirely with you.

Many times I have advised, if you have changed address or require your details to be withheld, that RSM need to be advised also. Or better still contact them and update your own records. Included with this issue of Info-line is a 'how to update your records' produced for you by Tony ZL1UD. For me this will be the last time I will print this information, I cannot be held responsible for incorrect errors to addresses.

Now for those of you who requested your details be withheld - please contact RSM directly as I will no longer enter into discussion in this regard. Phone number 04 472 0030.

### **Membership Promo:**

Many of you will be aware that NZART Council approved a membership promotional offer to all amateurs. This required again receiving a copy of the information held by Radio Spectrum and comparing it with records we have. NZART database is not equipped to record two call signs, therefore those who hold a primary and secondary call sign and are already members, may have received this special offer by mistake. I apologise if this has happened, however again, to review some 4500 amateurs throughout New Zealand takes a bit of work.

Again there is no need to send in rude comments on the application form, not only wasting my time, but also postage costs. Those of you who are guilty of this will I am sure have considered this and penalised us over a small oversight.

Furthermore, there are a number of silent keys whose partners received this letter. While we are going to be writing directly to these people to have them relinquish the call sign, if you know of anyone who has recently become a silent key, please ask the spouse or partner to let me know. I need to receive from them in writing, whether the call sign can be removed or if a family member wishes to take it over.

Better data integrity can be maintained providing information is passed on to the correct places.

Sorry about the negativity of my bit this issue - but I can assure you I have doubted whether my worth as your Business Manager has come to an end.

Talk soon....Deb ZL2TDM

## Procedures for Checking the RSM Database

Checking the RSM Database  
from Tony Case ZL1UD

NZART Council

This years Callbook has created a lot of flack that has been misdirected at NZART. The information contained in Callbook comes from the RSM register of public information. The only piece of information that you cannot hide from the public register is your name.

**How to check the register:**

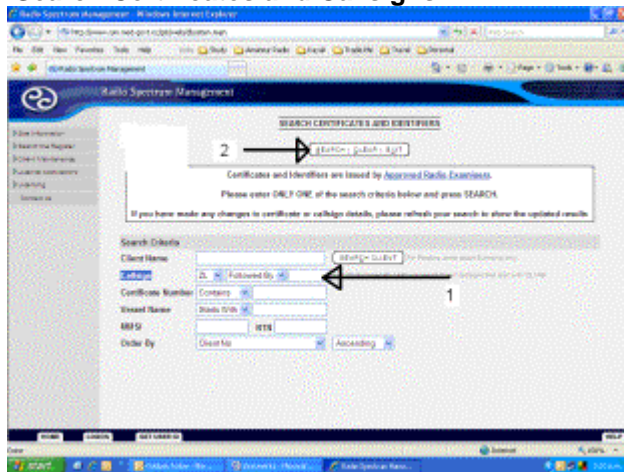

Go to <http://www.rsm.med.govt.nz/> you will get an error report. Click EXIT and this will place you on the following page:

Click on Search the Register

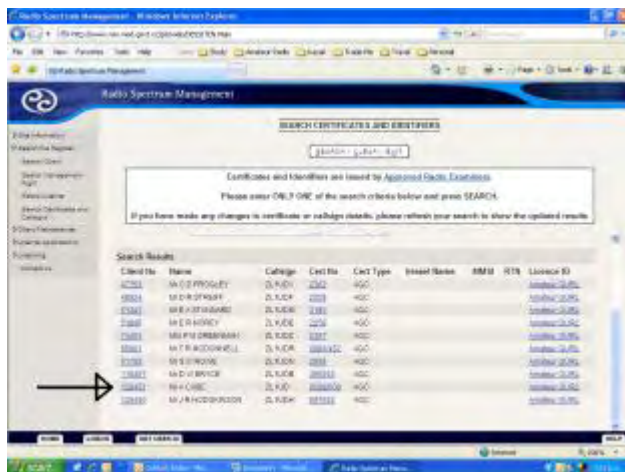

Click Search Certificates and Callsigns

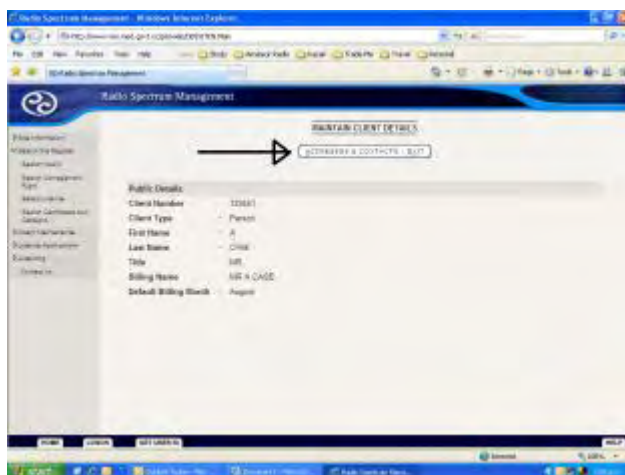

1. Type in your callsign (e.g. 1UD) and

2. Click Search at the top of the page.

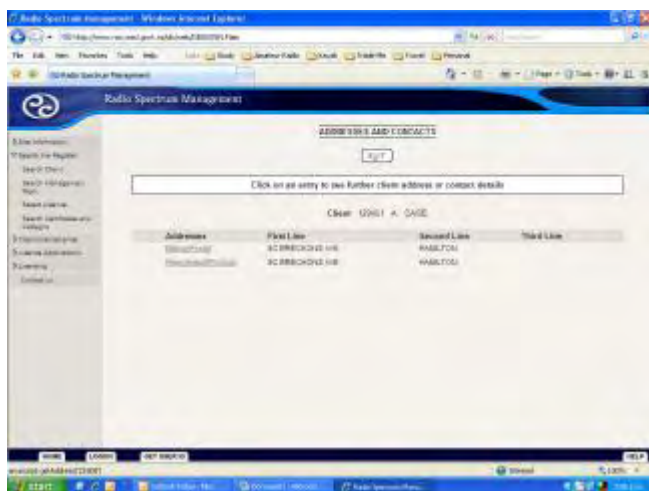

This will direct you to a list of callsigns (if you have a 2 letter call) or your own callsign (If you have a 3 letter call).

Click on the Client Number you wish to look up.

Click on Addresses and Contacts.

This will show you both your Billing / Postal, and Residential / Physical address. If you feel it necessary, both of these can be withheld. IT IS YOUR RESPONSIBILITY to withhold these if you wish for them to be withheld, and IT IS ALSO YOUR RESPONSIBILITY to ensure that your request has been actioned. To change this information, phone 0800 RSMINFO or 0800 776-4636.

NZART cannot change any information that the MED give us for Callbook. It is your responsibility to ensure that the Public Information the MED Hold is correct; remember if you move or die, you are required by regulation to inform RSM within 7 days.

If you log on to SMART, the RSM database, you can withhold information online and print your own certificate. For this you will need your Client Key; Client Password and Client ID; these were sent you by RSM, and if they are lost, they can be replaced by phoning RSM.

## 2007 Doug Gorman Memorial Frequency Measuring Contest Results

## Comments

This year's contest is unique in that it resulted in three perfect scores from three different Branches. As far as we can remember, this is the first time that there has been a three way tie for the Norm Edwards Shield and with perfect scores as well. Well done and congratulations to Murray Greenman, Chris Muir, and Mike McAlevey. Two entries were received for the John McKim cup, well done Mike Burch and Jim Lovell. Some contestants reported difficult conditions, especially those who were close to the centre of the country who were just out of range of the ground wave, and the sky wave would have been going straight over their heads. Reasonable reports were received from more distant stations. Once again Branch 65 Papakura receives the Branch Award. No results were received from some contestants who checked in after the contest.

For those who are interested, we use three frequency counters at the transmitting site. One counter is a high quality recently calibrated Agilent 53131A frequency counter. The other two universal counters are a Racal 9915 and a HP 5328A. All the meters are referenced against an Efratom Rubidium Frequency Oscillator which is what we use as our standard for the contest.

We both enjoy running the contest. It is a unique event in which both ourselves as well as the entrants have only one chance a year to get it right.

## Contest News

### VHF Contests

Prepare for VHF Field Day coming up on Saturday December 2. 2007 and Sunday December 3 2007.

### HF Contests

Band conditions continue to show no marked improvement despite the predictions that the present Sunspot Cycle should have shaken off. The Solar Flux Indices have remained around the high 60's for the past 3/4 months.

The 2007 Oceania CW Contest experienced some indifferent band conditions which will not have assisted improved scoring when compared to the 2006 Contest. Unfortunately I had to be a late scratching from the ZM1A Team due to an abscessed tooth, but Ken, ZL1AIH and Aki, ZL1GO achieved an admirable result in the Mutli Multi Section.

Next up, is the 2007 CQWW SSB Contest next weekend and one can only hope that some enhanced band conditions may occur - hope springs eternal !.

### **Scouting and Guiding in NZ: Canterbury Jamboree or 'CJAM'**

The Canterbury Jamboree or 'CJAM' is on at the end of the year over the Christmas break CJAM is happening 28 Dec to 5 Jan for campers. Set up 27 December and take down 6 January 2008. It will be a \*international\* scouting event. Over 4000 scouts and 1000 visitors are expected. This will be Amateur Radio in Canterbury's last chance for the next 20 years to demonstrate amateur radio to a large range of people.

Volunteers are required to make the camp a success. Before you can attend you must undergo a Scout check. Unfortunately this is mandatory and can not be waived. Without a scout warrant you will not be permitted onsite.

The more people we have to volunteer the less everyone will have to do. Lets show everyone what amateur radio is all about while we have the chance. Remember this is a once in 20 year event! Even if you can only volunteer to help set up then its better than nothing at all. Remember its for the kids, lets not let them down.
