ELG Report

Nigel Goldstone ZL2SEA has applied for a H.F. base station licence in 80 m , 40 m and 20 m bands.

The modes are USB digital data, Pactor, Winmore, Ardop, Vara.

The proposed frequencies are 3647, 3657, 3717, 7113, 7123, 7133, 14127, 14137 kHz.

We understand from Nigel: Only one frequency is in use at at any time. The user selects a clear channel, the base receiver scans between the channels and finds the clear incoming channel and the transmitter responds on that frequency.

It does not transmit or beacon unless it receives a connect session. All connections are monitored and logged.

The location is Kaipara Road, Papakura. Topo50 BB32 761.1 966.7. Engineering by ARE035 (ELG)

YUDX Contest

Dear testers,

We invite you to participate in **YUDX Contest 2019**.

The term to hold the contest is still the third full weekend of April,
i.e. Saturday at **07:00 UT** up to Sunday at **06:59 UT** (**April 20-21 in 2019**).

(pay attention to the changed start time of the competition)

For more information please see: <http://yudx.yu1srs.org.rs/2019/>

Lets meet in YUDX Contest 2019,

YUDX Contest Committee

QRM.guru

News release

From the Radio Amateur Society of Australia RASA.

RASA announces the release of QRM.guru

This is an innovative web delivered resource that allows amateurs to investigate, identify and hopefully resolve the most common issues that affect the hobby, that is increasing Interference.

Chris VK3QB one of the developers of this resource said, "For the first time and in one place, QRM.guru provides a coordinated set of resources and self-help for amateurs to find out about QRM issues and techniques in resolving them."

He continued "QRM.guru is built on a knowledge base platform which is scalable and provides a more effective way to store and search for information. It is interactive in that its further development will require engagement from amateurs who have their own stories to tell and hopefully solutions to interference issues and so the website will continually develop and will be of interest to all amateurs world-wide"

The site is accessed by getting on line to QRM.guru/ and clicking "start here".

QRM.guru is a project of RASA and has been designed as a free resource for all, in the spirit that is Amateur Radio.

Please send questions or feedback to feedback@qrm.guru.

NZART Conference June 2019

New Plymouth Amateur Radio club are pleased to announce registrations are now open for 2019 NZART Conference on the conference website at:

Combining Cambridge Te Awamutu and Waitomo Branches

Hi.

I have lived in South Waikato for 4 years now and notice there is no amateur radio branch activity. I would like to help change that – but I can't do it alone. I believe 3 branches (Cambridge Te Awamutu and Waitomo) is too much and as such (but not the only reason) not much is happening. I would like us to become one. The detail around the finances (I understand that each branch still has a bank balance) can be ironed out. But let's come together and get some activity going in our area.

The best place to start is let's hold a meeting, see who we can get to turn up and see if there is local appetite to move with this. I would like to propose April the first (no joke folks) in Te Awamutu (fairly central). Let me find a suitable venue to be determined.

SO, what can you do? Please pass this on to any and all hams (or potential hams) in the catchment area of the 3 branches. If you have received this second hand – please contact me – Warren ZL2AJ warren@zl2aj.com so that I can put you on the list. Once I have the details for 1 April, I will contact all that have made contact with me and we can meet and make some decisions about where we want to go from here.

About me

I am an electrical engineer for The Lines Company and an electrical trainer. I am about to start on NZART council (again). In amateur radio I enjoy participating in SOTA (Summits On The Air) and in running amateur licence courses, bringing new blood into the hobby.

Thanks all

Warren Harris ZL2AJ
